Privatisation and MBO.

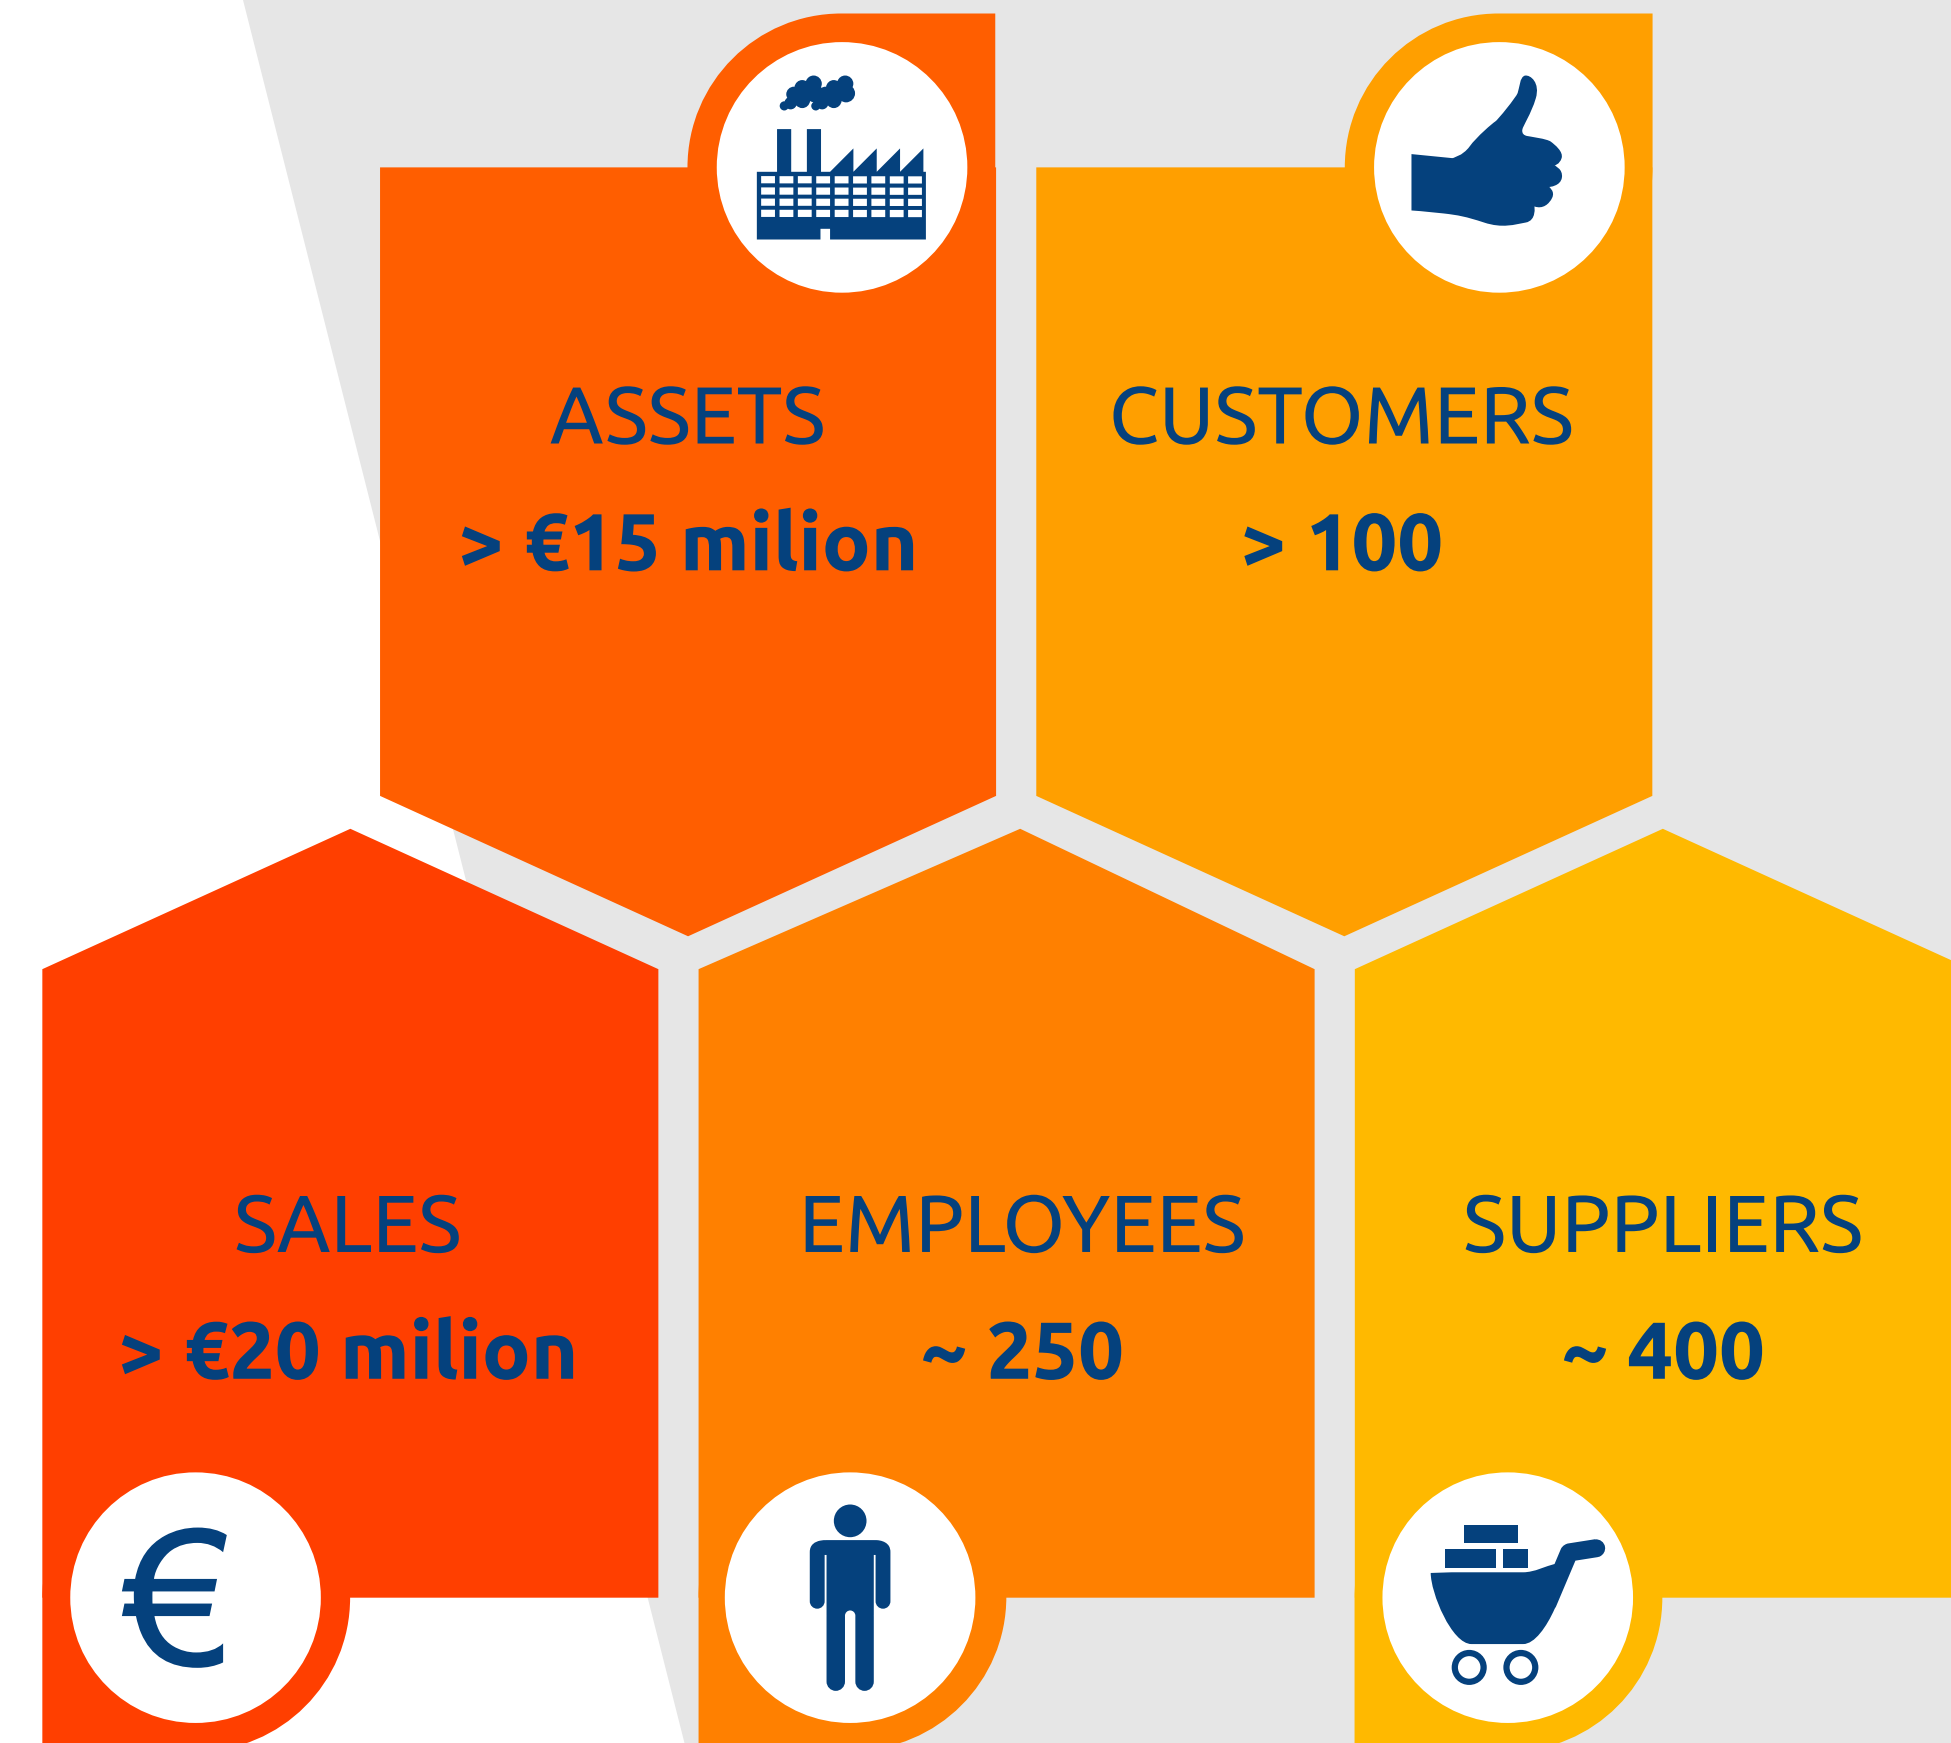

Building on our history

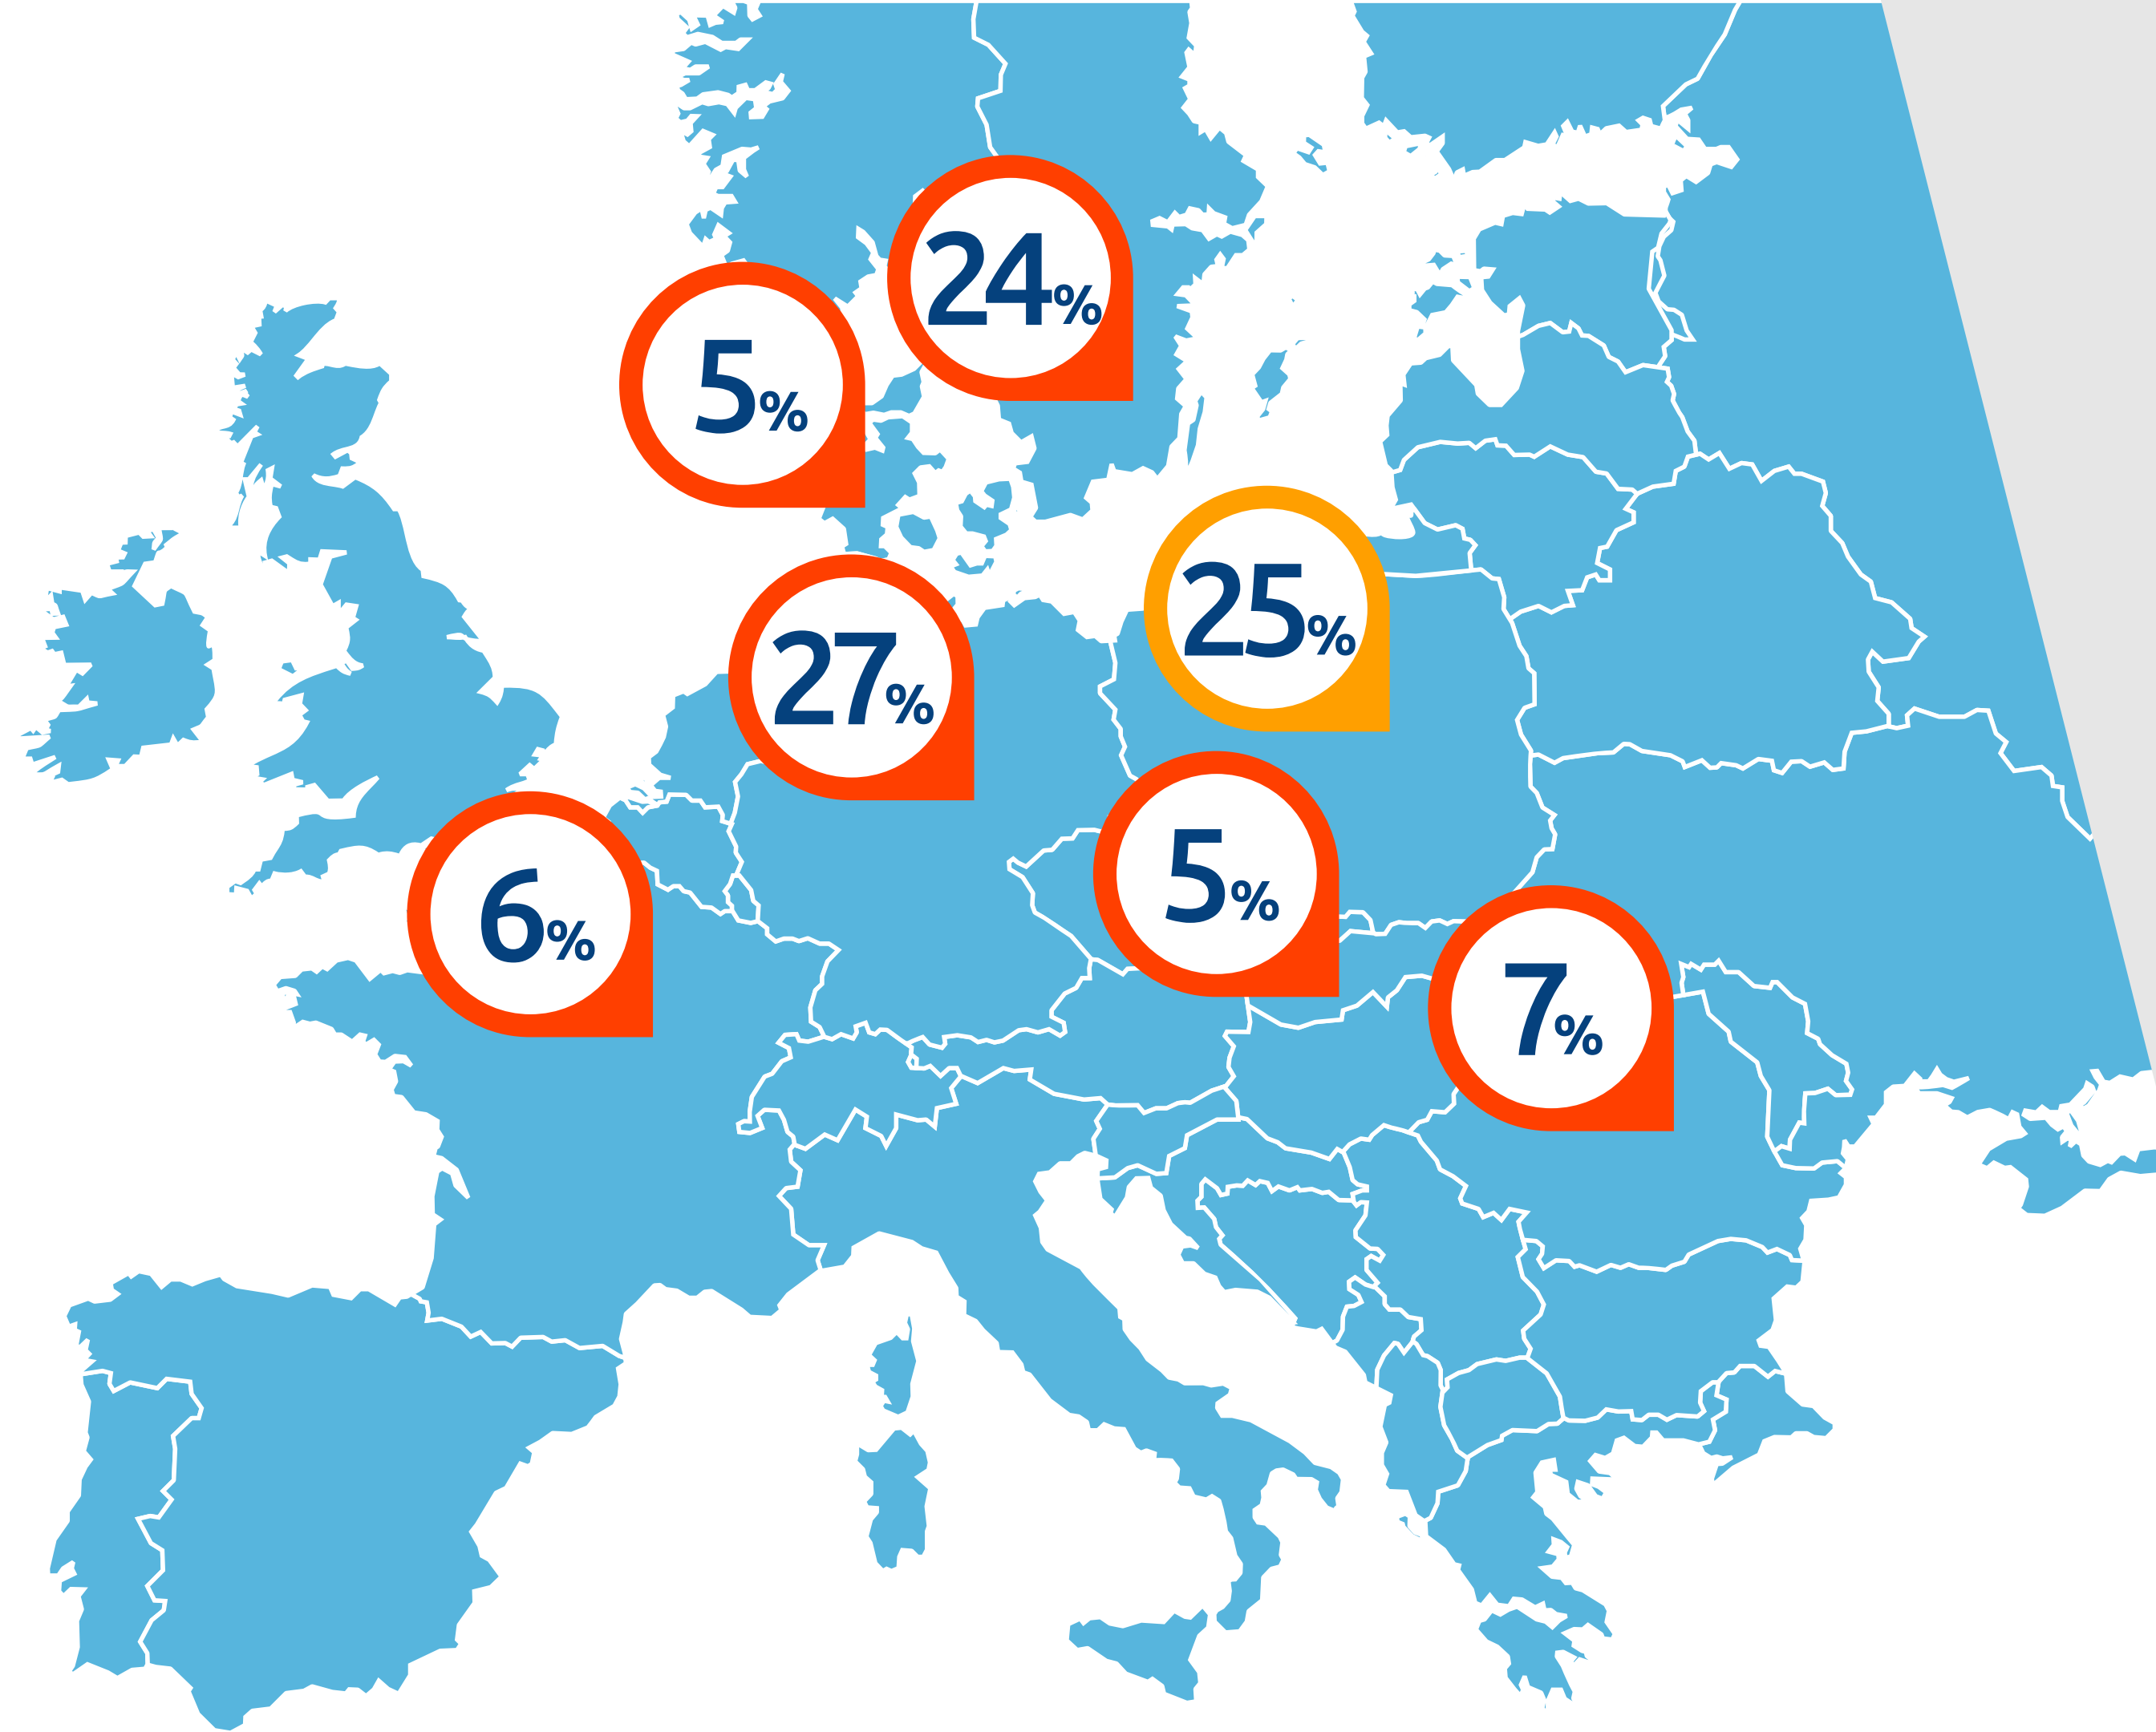

Immense scope of production variety:

- No. of new orders per year - **9.000**
- No. of new products introduced ~ **250**
- No. of ongoing products - **3.500**
- Volume of items sold - **2.2 milion**
- Production area - **26.000 sqm**

RapidRatings: Very low default risk,
with strong Core Health.

Creditreform: Solvency Credibility
- very good payment capability.

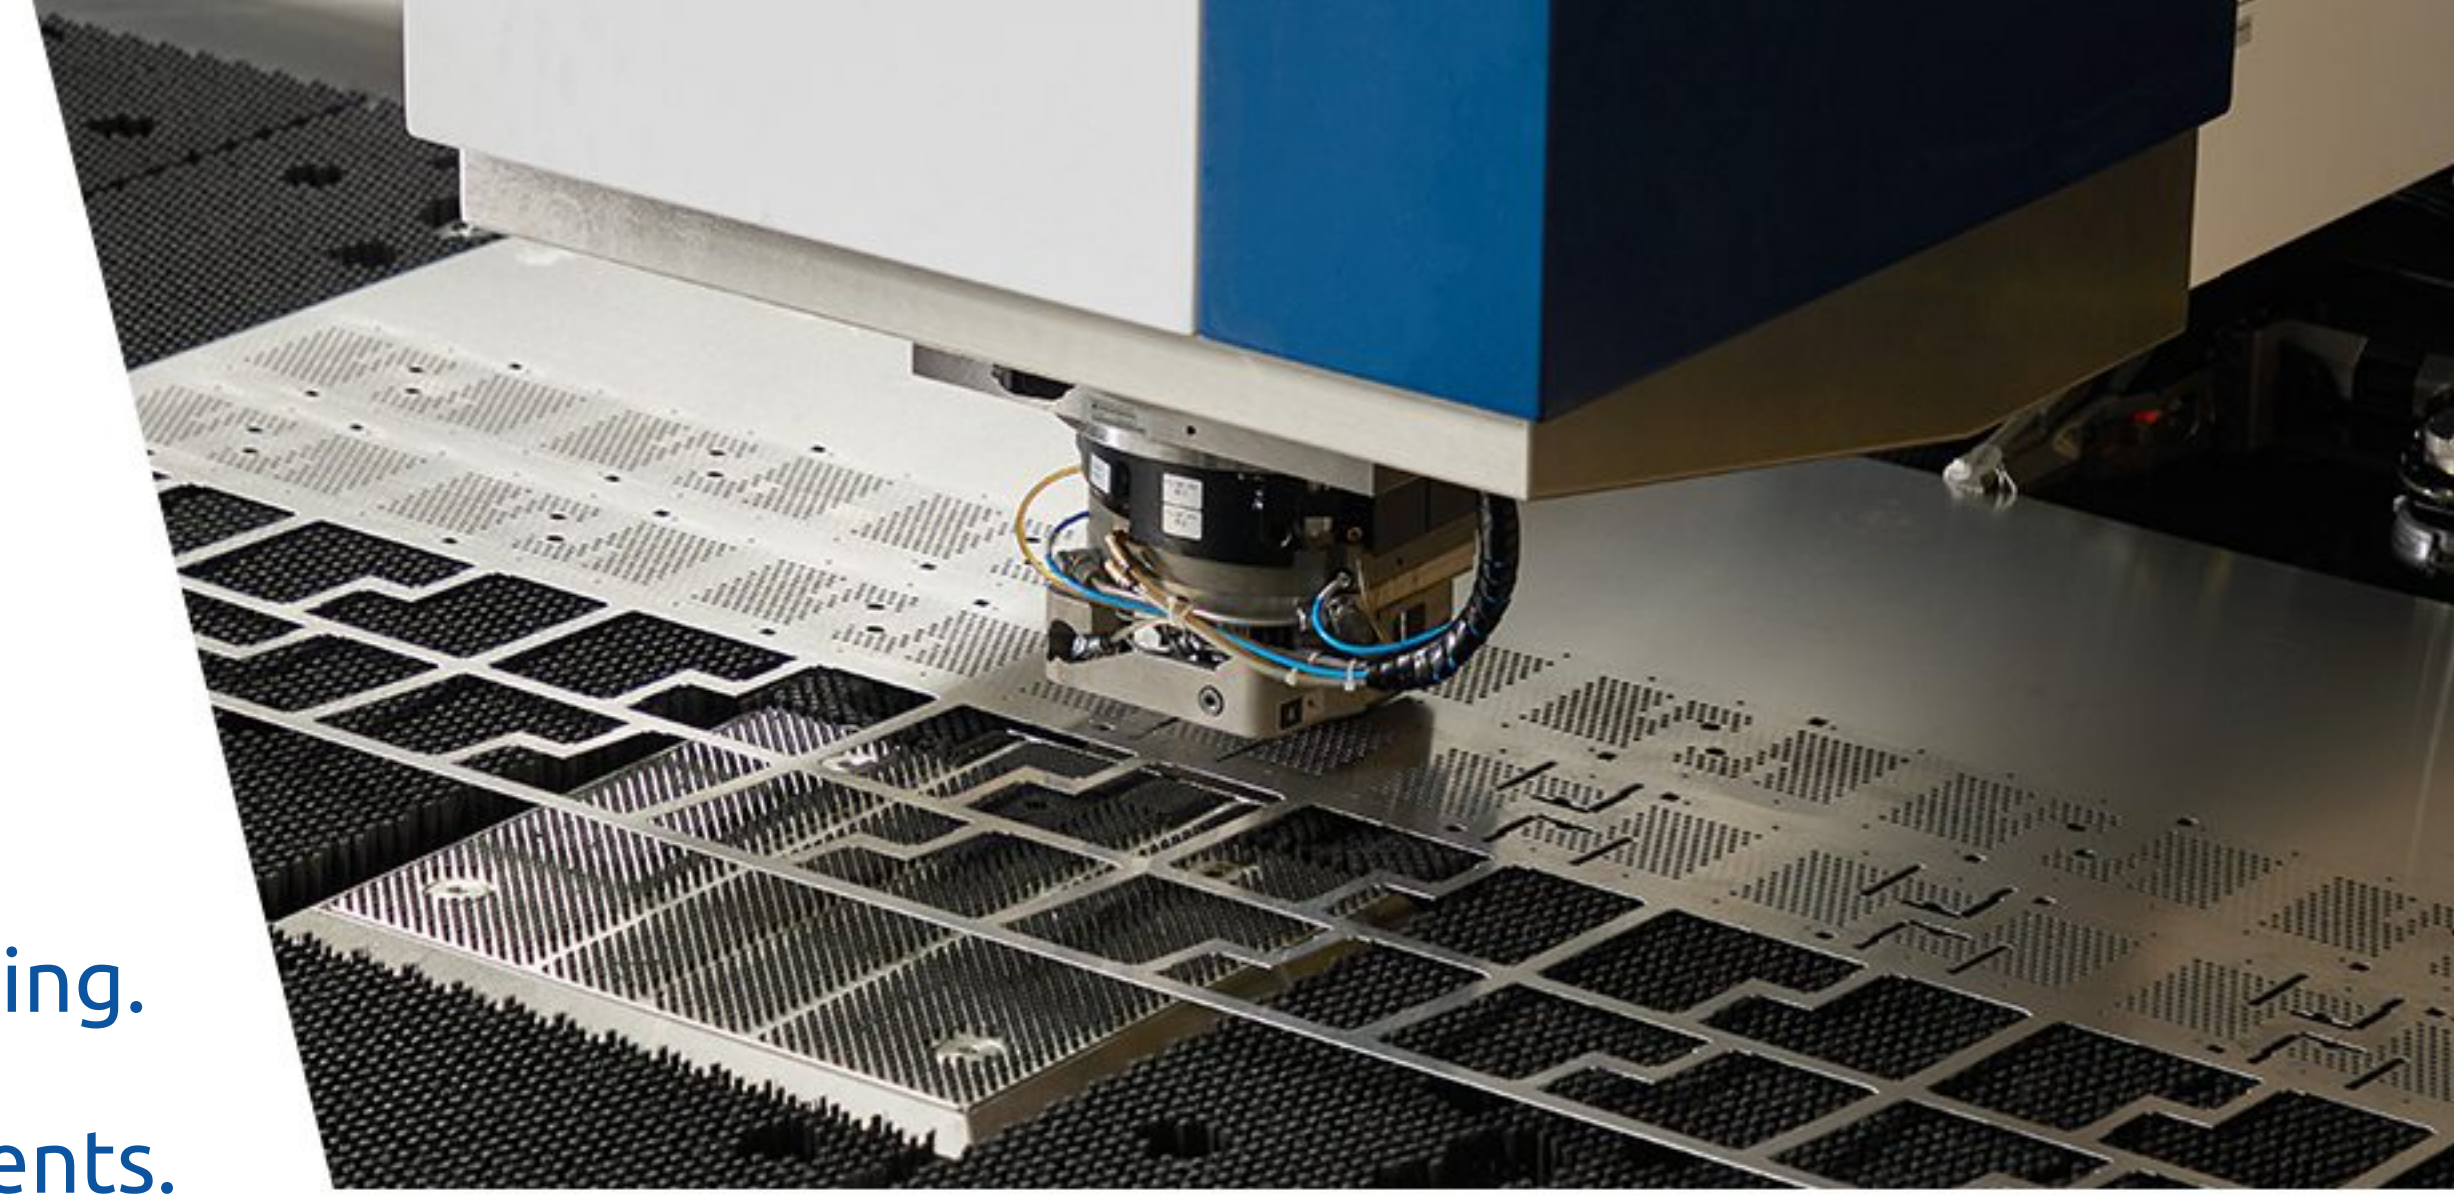

Sales by destinations in 2022

Sheet metal punching and laser cutting

We offer sheet metal punching and laser cutting by using the most modern punching presses and laser cutters guaranteeing:

- The high quality and precision of punching and cutting.
- The possibility of cutting the complex shapes elements.
- A full automatization and optimal usage of material.

Technical capabilities

Plastic processing of metal sheets

We have the most modern press brakes and specialized tools. Our experienced team of engineers supervises every stage of the forming process.

Advantages of our services in the field of sheet metal plastic processing:

- Usage of modern machines and technology.
- The possibility of multi-dimensional bending of metal sheet.
- The possibility to make very complex shapes.
- A production repeatability.

Technical capabilities

Machining

We offer our clients professional services in the field of machining using the latest machinery:

- Vertical centers.
- Horizontal centers.
- 5-axis centers.

We provide high quality, efficiency and repeatability of processes, the ability to process materials with very complex shapes.

Technical capabilities

Welding

We specialize in professional welding:

- With shielding gas Argon and CO2.
- MIG, TIG and MAG welding methods up to 400 A.
- LASER.
- Welding on universal welding stations equipped with positioning devices.
- Welding with the use of modern welding robots.

The scope of our services includes:
carbon steel, stainless steel, aluminum, brass.

Technical capabilities

Powder coating and wet painting

We own a modern powder coating shop and wet painting, guaranteeing:

- The highest protection of painted elements against corrosion.
- Aesthetics of workmanship without cracks and stains.
- High resistance to mechanical damage, temperature and chemical factors.
- Even coverage of hard-to-reach areas with paint.
- All types of surface, from high gloss, through matt to a thick structure.

Technical capabilities

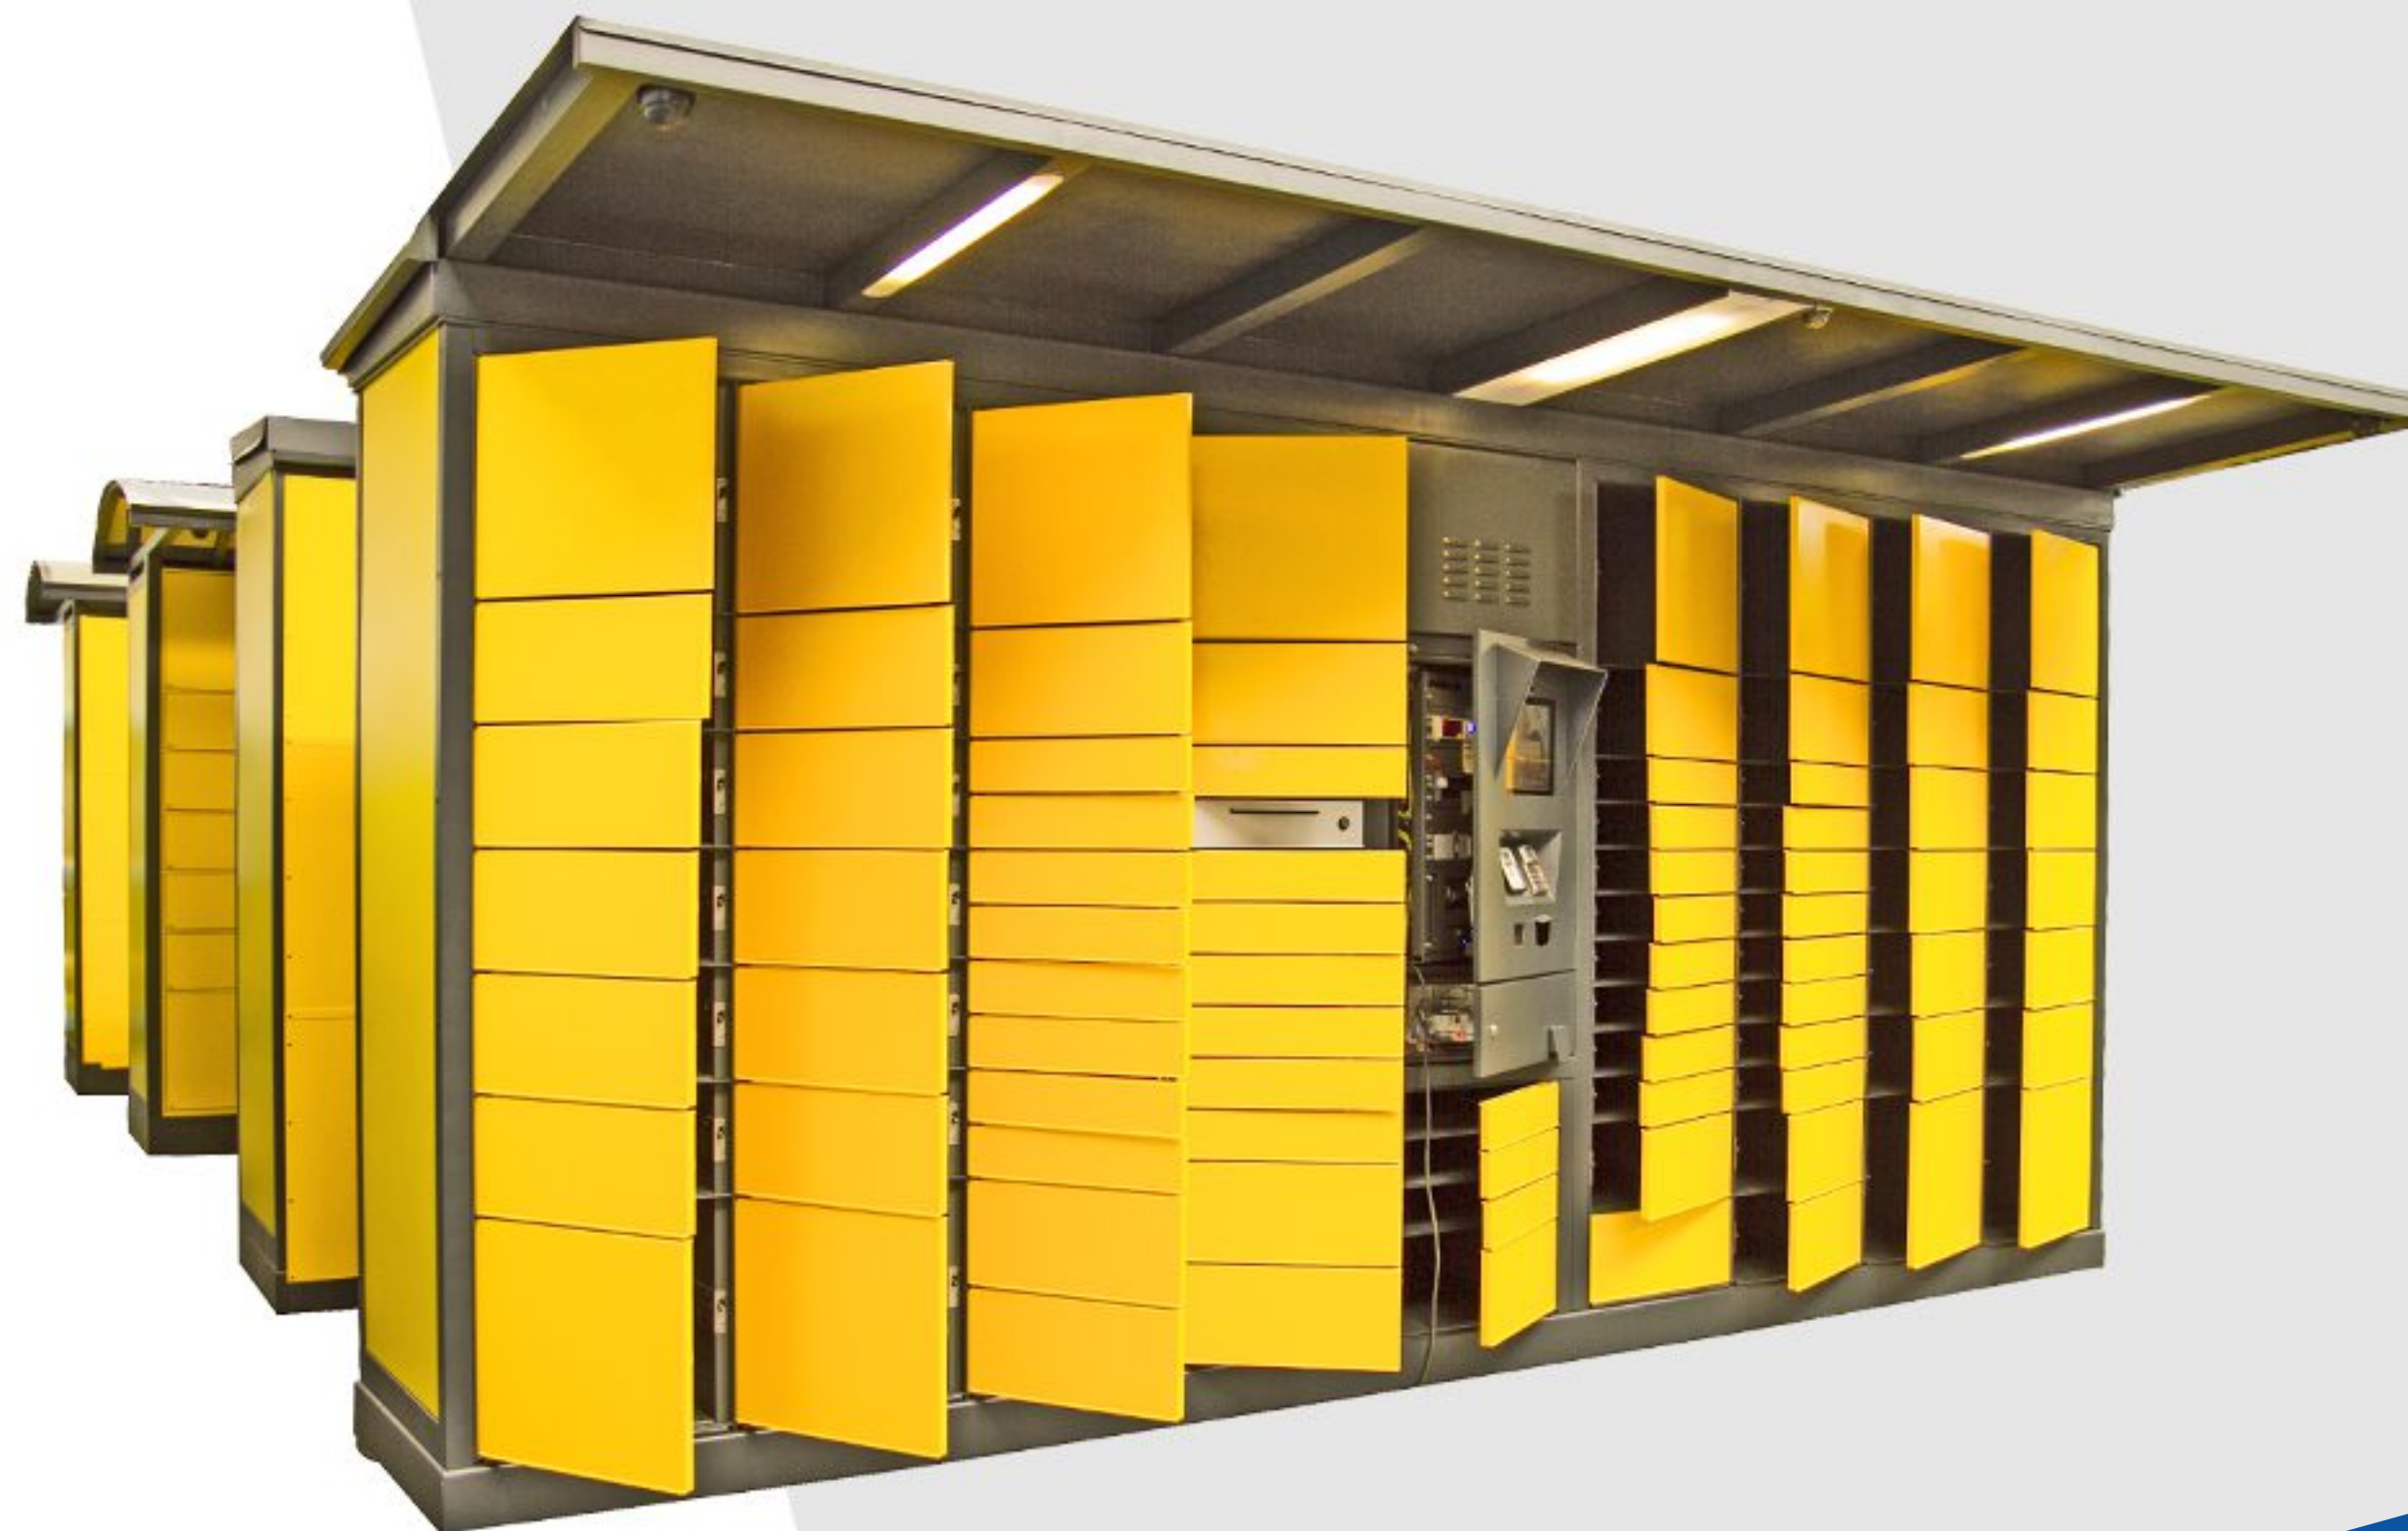

Assembly

We offer our clients a comprehensive mechanical-electronic products. Experienced and highly qualified staff is a guarantee of failure-free work of components and the whole devices.

Technical capabilities

Our possibilities

Our possibilities

Our possibilities

Our possibilities

Our products possibilities - CNC Machining

We engineer, re-engineer basing on the specifications or requirements of our customers

- CAD/CAM-Programs: Solid Edge; NX CAM
- ZAP-Kooperacja, the right choice for global challenge technical concept
- 3D modelling
- Dimensioning
- Complete Technical Documentation

Engineering

Our company also focuses on ecology, which is why:

- We meet all legal requirements regarding environmental protection.
- We invest in modern, environmentally friendly technologies and solutions.
- We actively engage our employees, customers and business partners in environmental protection.
- We prevent pollution, striving to constantly improve the condition of the environment.
- We conduct rational management of resources and waste.
- We have environmental certificate ISO 14001.
- We reuse over 70% of water through a circular economy.
- We recover technological heat for heating buildings during winter.

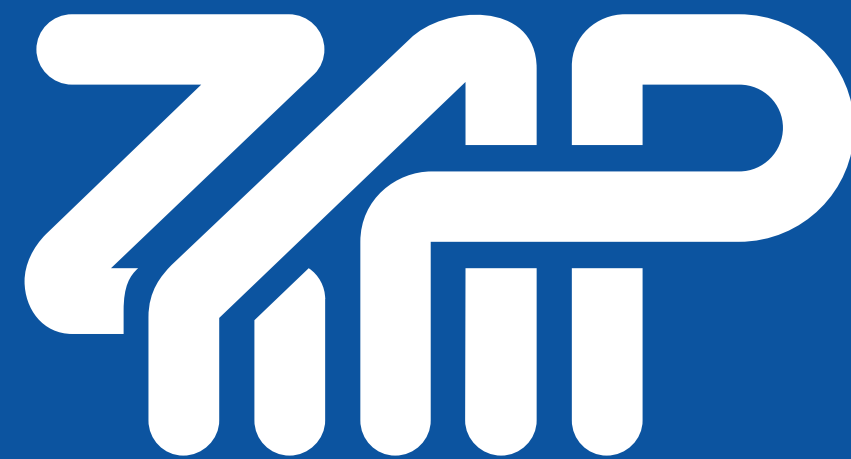

With respect for the environment
